

RECONDITIONED WINDOW REGULATORS

Our window regulators are reconditioned genuine units.

They are OEM genuine second hand units that have been fully rebuilt.

All repairs are made in accordance with strengthening the weak link/s of the original regulator.

Repairs are carried out with stronger more durable stainless steel cable wire, strengthened plastics, sliders and a replacement motor cog, these modifications make a stronger more robust unit, with a high quality of workmanship.

Our window regulators are sold with confidence, having years of experience behind the product.

These are not a cheap aftermarket generic brand.

Feel free to ask any questions.

When ordering, please advise us of which side is required.

As viewed from sitting in the driver's seat

RHF - Right Hand Front (driver's seat)

LHF - Left Hand Front (left of the driver)

RHR - Right Hand Rear (behind the driver's seat)

LHR - Left Hand Rear
